

About Us

Advanced Fuels is one of the most respected names in the automotive industry in Australia and the Asia-Pacific region.

Our reputation for innovation stems from our affiliations with several leading industry organisations.

Advanced Fuels is an Accredited Trainer and offers a comprehensive training package for both national and international automotive personnel specialising natural gas fuels, including compressed natural gas (CNG) and liquefied natural gas (LNG). We are represented on the Standards Australia Committee for compiling and implementing standards for the CNG industry. In addition to training and development, we offer a wide range of services in the areas of consulting to industry sectors such as Government advisory bodies and trade organisations.

Advanced Fuels is a Foundation Member of the Asia-Pacific Natural Gas Vehicles Association (ANGVA) and is a member of the Standards Australia (SAA), Victorian Automotive Chamber of Commerce (VACC), Society of Automotive Engineers (SAE), and the Institute of Automotive Mechanical Engineers (IAME).

Advanced Fuels is at the forefront of research and development in gaseous fuels and is currently engaged in projects involving Compressed Natural Gas (CNG), Liquefied Natural Gas (LNG) and hydrogen vehicles.
